Abstract of JP2004294642

PROBLEM TO BE SOLVED: To solve a problem that a flow path of cooling air for directing the cooling air onto an exposure device is difficult to be acquired in a compact image forming device.

SOLUTION: The image forming device is characterized by the fact that a part of the casing of the exposure device is formed with a dust cover, and a part of a duct which forms the flow path of the cooling air is formed with the dust cover.
